

Issued in April.2005

Our product package includes: cable hanger, grounding kit, connector and jumper, cable entry, grounding bar, cable ladder, telecom slot, telecom tower, moving room, surge arrester, antenna, rubber mastic & electrical tape, fastening pieces.

Hanger series

* Usages

The hanger is mainly used for the fixation between RF cable and tower, cable ladder, etc.

*Composition

stainless steel, anti-ultraviolet ABS engineering plastics and ageing-resistant rubber. Accordingly, the hanger made of different materials can be used in different ranges of temperatures.

*Types

stainless steel hanger, elliptical waveguide hanger, round member adapter kit, and plastic hanger.

Grounding kit series

* Usages

Grounding kit is used for the grounding of RF feeder

*Options

standard grounding kit, sure grounding kit, sure ground plus grounding kit, and indoor connector grounding kit.

*Composition

We use brass as grounding conductor, which has high current handling and good heat exchanger capability.

Connector and jumper series

*Types

DIN connectors, N connectors, adaptors.

Cable entry

Including cable entry plate and weatherproofing kit,

*Usages

used to waterproof before feeder is put into equipment shelter.

*Properties

good airproof and easy installation.

*Options

aluminium alloy wall / roof feed thru plate, stainless steel wall, alterable cable entry, cable entry boot , and other accessories.

Grounding bar

*Usages

made of brass, and is used to connect grounding cable.

*Applications

can be installed in any required place such as tower, indoor or outdoor of BTS.

Cable ladder***indoor cable ladder**

made of steel or aluminium alloy with surface disposed of anti-oxidation and zincification

used to colligate and lay different kinds of cables in equipment shelters, etc.

***outdoor cable ladder**

made of steel. It features high intention and ageing-resistance.

***Options:**

indoor flat cable ladder, indoor multi-hole cable ladder, indoor rectangle tube cable ladder, indoor stainless steel multi-hole cable ladder, out door cable ladder, u-steel.

Moving room***Composition**

made of EPS or PU insulation colorful steel panels

***Usages**

widely used in communication, electricity, water conservancy, public security, transportation, scenic spots, etc.

Rubber mastic & electrical tape***Usages**

Water proofing for feeder and preparation of feeder

Tower***Usages**

Used to heighten the altitude of antenna which is fixed on the roof in order to achieve better signal coverage.
